Fahrzeughersteller Bezug genommen wird, dient dies nur zu Vergleichszwecken. Eine Verwendung derartiger Angaben in Rechnungen an den Fahrzeugbesitzer ist nicht statthaft.

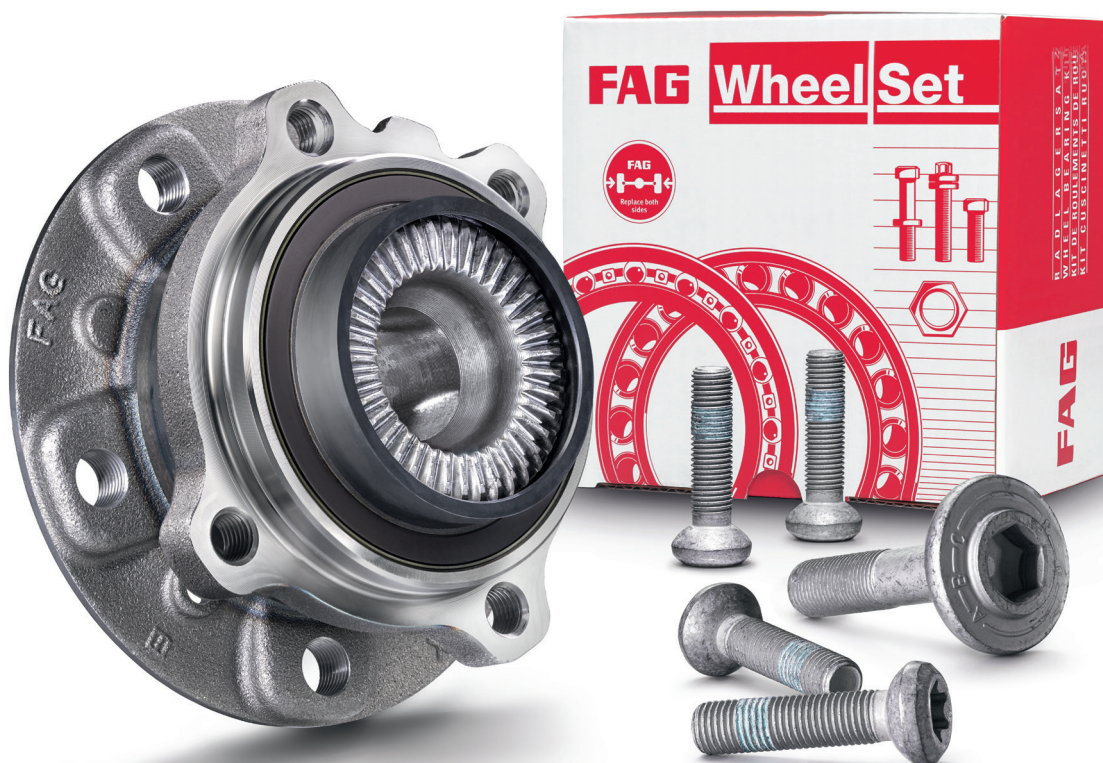

## Schaeffler im Automotive Aftermarket – vier starke Marken.

Der Automotive Aftermarket ist ständig in Bewegung. Die Anforderungen und Erwartungen aller Marktteilnehmer wachsen stetig. Bestehen kann daher nur, wer diesen hohen Ansprüchen gerecht wird und sich diesen Herausforderungen stellt. Mit den vier starken Marken LuK, INA, FAG und Ruville ist Schaeffler im Automotive Aftermarket bestens für die Zukunft gerüstet.

Der Unternehmensbereich Automotive Aftermarket liefert innovative Reparaturlösungen in Erstausrüsterqualität und legt dabei ein besonderes Augenmerk auf umfassende Serviceleistungen für Werkstätten. Ob Antriebsstrang, Motor oder Fahrwerk – allen Produkten liegt ein umfassender Systemansatz zugrunde. Innovation, technisches Know-how sowie höchste Produkt- und Fertigungsqualität machen Schaeffler nicht nur zu einem der führenden Entwicklungspartner in der Serienfertigung, sondern auch zum richtungsweisenden Anbieter von werterhaltenden Ersatzteilen und ganzheitlichen Reparaturlösungen – immer in Erstausrüsterqualität.

FAG liefert alles für den einwandfreien Radlagerwechsel. Die zuverlässigen Radlager und innovativen Reparaturlösungen reichen vom klassischen Radlagerset FAG WheelSet, über das FAG WheelPro

(für den achsweisen Radlagertausch) bis hin zu Radlager-Reparaturlösungen für leichte Nutzfahrzeuge sowie vormontierten Radlager-Einheiten für schwere Nutzfahrzeuge, wie der FAG RIU (Repair Insert Unit) und dem FAG SmartSET.

## Reparaturlösungen von Profis für Profis

Seit 1883 ist FAG der Profi für Präzisionslager. Diese langjährige Erfahrung bei einem so stark beanspruchten Teil wie dem Radlager ist ein großer Vorteil für die Werkstatt. Sie profitiert vom FAG-Know-how. Seit 2005 ist das Radlagersatzprogramm von FAG im Ersatzteilmarkt verfügbar. Heute gehören sie zu den am gefragtesten Radlagern. Werkstattprofis schätzen Qualität und setzen daher auf die große Erfahrung von FAG.

Ihnen ist die Langlebigkeit und Präzision der von ihnen verbauten Teile besonders wichtig. Weil FAG darauf achtet, dass jede Reparatur so einfach wie möglich gelingt, befinden sich in den FAG-Verpackungen neben dem Radlager sämtliche Zubehörteile, die für die professionelle Reparatur notwendig sind.

Und gerade diese zusätzlichen Teile machen den Unterschied aus: Die mit verschiedenen Sicherungssystemen ausgestattete Schrauben und Muttern sind perfekt auf das jeweilige Radlager und Fahrzeug abgestimmt. Denn eine perfekte Reparaturlösung ist die Summe ihrer Einzelteile – in hoher Qualität und mit den dazugehörigen Services. So wird erreicht, dass

- der Sitz des Radlagers im Achsschenkel gesichert ist,
- die Vorspannung des Radlagers auf Dauer erhalten bleibt,
- ein optimaler Rundlauf gesichert wird,
- unnötiger Verschleiß und eventueller Ausfall des Radlagers vermieden wird.

Radlager und das dazu passende Zubehör sind als ein System zu sehen. Die Qualität und das intelligente Zubehör sind die essentiellen Bausteine des Sicherheitskonzepts. **Zusammen ergeben sie das FAG Sicherheitssystem, dem Sie jederzeit vertrauen können.**

FAG weiß: Zeit ist Geld. Deshalb enthalten unsere Verpackungen zusätzlich non-verbale Einbauanleitungen, wenn diese notwendig sind. Damit kommen Sie schnell zum Ziel. Wer doch einmal Unterstützung benötigt, findet auf dem Werkstattportal REPXPERT die nötigen technischen Informationen zu allen Artikeln aus dem Hause FAG. Darüber hinaus steht unsere kostenlose Service Hotline zur Verfügung.

### FAG WheelPro – das clevere Angebot für langjährig gefahrene Fahrzeuge

Mit 60 Artikeln für ca. 114 Millionen Fahrzeuge in Europa deckt dieses Produktangebot den Wunsch der Kunden nach einem attraktiven Preis ab. Bei Fahrzeugen mit einer hohen Laufleistung kann nicht ausgeschlossen werden, dass auch das zweite Radlager auf derselben Achse kurzfristig ausfallen wird.

FAG WheelPro ist als Reparaturlösung für die komplette Achse eine vorbeugende Instandhaltungsmaßnahme, die langfristig Zeit und Geld des Kunden einspart. Und das für nahezu jedes dritte Fahrzeug in Europa!

## Darum lohnt es sich, auf FAG Radlager zu setzen

Radlager sind sicherheitsrelevante Bauteile. Bei FAG ist Qualität auf allen Ebenen selbstverständlich. Material, Entwicklung, Fertigung und Tests erfüllen höchste Ansprüche. Die größte Marktabdeckung im Bereich PKW hebt FAG besonders aus dem Kreis der Wettbewerber hervor. Doch nicht nur das spricht für die Marke – mit patentierten Innovationen ist FAG ein bevorzugter Entwicklungspartner der Automobilindustrie, treibt stetig die Weiterentwicklung voran und bietet für alle Problemstellungen die angemessene Lösung.

- 1 Standard-Kegelrollenlager**

2-reihiges, abgedichtetes Schrägkugellager mit Multipolencoder
- 7 Generation 2D**  
2-reihiges, abgedichtetes Kegelrollenlager

Innovationen von FAG sind richtungsweisend für die Automobilindustrie. So hat FAG nicht nur die Kugelschleifmaschine für perfekte Kugeln erfunden und patentiert und damit die Industrialisierung der Wälzlagerfertigung eingeleitet. Mit der Erfindung des Wälznietbunds sorgte FAG dafür, dass die Vorspannung des Lagers von Anfang an definiert und voreingestellt ist. Damit ist der Radlagerwechsel einfacher und sicherer geworden. Der Sperrkranz und die Stirnverzahnung tragen zu mehr Sicherheit und schnelleren Reparaturvorgängen bei. Gleichzeitig schützt die Leichtlaufdichtung LFT die modernen FAG Radlager sehr wirksam vor Verschmutzungen und sorgt gleichzeitig für mehr Effizienz durch weniger Reibung.

#### 8 Generation 2.1

2-reihiges, abgedichtetes Schrägkugellager mit Wälznietbund, Multipolencoder und Sperrkranz

#### 9 Generation 2.1

#### 13 Generation 3.2

2-reihiges, abgedichtetes Schrägkugellager mit Wälznietbund, Multipolencoder, Stirnverzahnung und Leichtlaufdichtung

## Spezialwerkzeug

FAG Radlager-Reparaturlösung für Transporter, Art.Nr. 400 6199 10

Ein Radlager-Schaden ist keine große Sache, solange es sich nicht um eine Achsträger-Radlager-Einheit handelt. Dadurch muss bei der Instandsetzung der komplette Achsträger mit integriertem Radlager ausgetauscht werden.

Bei der FAG Radlager-Reparaturlösung für Transporter werden nur noch die Lager selbst gewechselt und sonst nichts!

**Die effektive Lösung spart mehr als 50 % der Gesamtkosten und viele Handgriffe.**

Lagerschäden treten bekanntlich bei hohen Laufleistungen und starker Belastung auf (wie z.B. schlechte Straßenbedingungen, Bordsteinrempler und übermäßige Belastung). Gewerblich genutzte Fahrzeuge sind darum besonders häufig betroffen. Die Mercedes-Modelle Vito, Viano und Sprinter sowie der VW Crafter sind werksseitig mit fest verbauten Radlagern im Achsträger ausgerüstet.

Längere Reparaturzeiten bedeuten für Unternehmen und Flottenbetreiber nicht

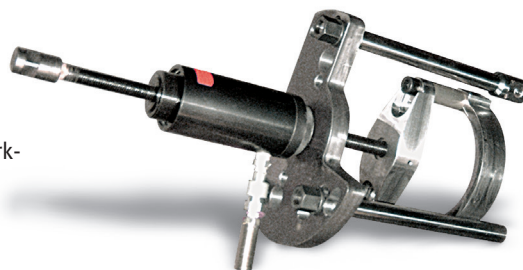

nur einen hohen Zeitverlust, sondern auch entgangenen Umsatz. Mit der FAG Reparaturlösung werden die Standzeiten minimiert. Ein starkes Argument für die Werkstatt und die beste Lösung für hohe Kundenbindung und Zufriedenheit.

### **Schneller auf Achse!**

Weit mehr als 60 % Zeitersparnis gegenüber einer herkömmlichen Reparatur verschaffen klare Vorteile. Die kostengünstigere und schnellere Instandsetzung setzt neue Maßstäbe. Statt langer Standzeiten mehr Spielraum bei der Zeitplanung in der Werkstatt.

Ohne Achsvermessung, ohne Achsträgerwechsel – Aus- und Einbau des Achsträgers und die damit verbundene Achsvermessung entfallen vollständig.

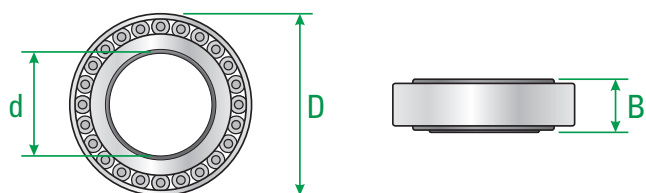

Die FAG Radlager-Reparaturlösung für Transporter ist die beste Boxenstopp-Strategie für mehr Effizienz in jeder Werkstatt.

## Schaeffler REPERT

### Die Servicemarke für Werkstattprofis.

Mit REPERT bieten wir umfassende Serviceleistungen rund um unsere Produkte und Reparaturlösungen von LuK, INA, FAG und Ruville an. Sie suchen gezielte Informationen zur Schadensdiagnose? Oder benötigen Sie konkrete Arbeitshilfen, die Ihnen den Werkstattalltag erleichtern? Ob Onlineportal, Servicehotline oder Events – REPERT bietet Ihnen alle technischen Serviceleistungen.

#### ARBEITEN

## Schaeffler in the automotive aftermarket – Four strong brands

Schaeffler in the automotive aftermarket – four strong brands. The automotive aftermarket is constantly changing. The demands and expectations of all market participants are increasing all the time. The only way to survive is to meet these high demands and face these challenges head-on. With its four strong brands LuK, INA, FAG, and Ruville, Schaeffler is well equipped for the future in the automotive aftermarket.

The Automotive Aftermarket business division delivers innovative repair solutions in original-equipment quality, with a special focus on providing comprehensive services to repair garages. Whether for the transmission, engine, or chassis – all Schaeffler products in the automotive aftermarket are based on a comprehensive systems approach. Innovation, technical expertise, and the highest material and manufacturing quality make Schaeffler not only one of the leading development partners for vehicle manufacturers, but also a pioneering provider of value-retaining spare parts and complete repair solutions – always in original equipment quality.

FAG offers everything needed for flawless wheel bearing replacement. The durable wheel bearings and innovative repair solutions reach from the classic wheel bearing set FAG WheelSet, to the FAG

WheelPro (for a per-axle wheel bearing replacement), all the way to wheel bearing repair solutions for light commercial vehicles and pre-assembled units for trucks and trailers like the FAG RIU (repair insert unit) and the new FAG SmartSET.

## Repair solutions – By professionals, for professionals

FAG is the expert in precision bearings since 1883. The company's many years of experience in manufacturing wheel bearings – a part that is in particularly high demand – is a considerable advantage for garages. They benefit from FAG's expertise. FAG's range of wheel bearing sets is available to the spare parts market since 2005, and they are now among the most sought-after products of their kind. Garage experts appreciate quality, which is why they rely on FAG's experience.

For these experts, the durability and precision of the parts they install are particularly important. As FAG ensures that every repair can be carried out in the simplest possible manner, FAG packaging includes all of the accessory parts required to perform professional repair work, alongside the wheel bearing itself.

These additional parts make all the difference. The nuts and bolts are equipped with various locking systems and are perfectly tuned to their corresponding wheel bearing and vehicle. An ideal repair solution is only as strong as its individual parts, which is why these parts must be of the highest quality and be provided together with the relevant services. FAG's repair solution ensures that:

- The wheel bearing sits securely in the steering knuckle
- The preload of the wheel bearing remains the same throughout its service life
- The wheel bearing runs as true as possible
- The wheel bearing is protected from unnecessary wear and potential failure

Wheel bearings and their accessory parts together form a system. Quality and the right accessories are therefore essential building blocks in the overall safety design of a wheel bearing. **Together, they form the FAG security system – a system that you can always rely on.**

FAG understands that time is money. If necessary, our packaging therefore contains additional non-verbal installation instructions so you can achieve your goal faster. If you require support, the necessary technical information for all items provided by FAG can be found on the REPERT garage portal. Our service hotline is also available free of charge.

### FAG WheelPro – The smart solution for long-lasting vehicles

With 60 items for approximately 114 million vehicles across Europe, this range satisfies customers' demands for products at an attractive price. In vehicles with high mileage, it is possible that the second wheel bearing on the same axle may also fail after a short amount of time.

The FAG WheelPro repair solution is a preventive maintenance action for the entire axle, saving the customer time and money in the long run. And this service is available for almost a third of all vehicles in Europe!

## Why FAG wheel bearings are worth it

Wheel bearings are crucial for safety. At FAG, quality is ensured at every stage of the manufacturing process – materials, development, production and testing all meet the most stringent requirements. FAG's considerable market coverage for passenger vehicles gives the manufacturer an edge over the competition. However, this is not the only reason to choose the brand. With its patented innovations, FAG is the preferred development partner for the automotive industry, continuously driving forward progress and providing the ideal solution for any problem.

- 1 Standard tapered roller bearing**  
Dismountable tapered roller bearing

- 2 Generation 1**  
Double-row angular ball bearing with/without multipole encoder

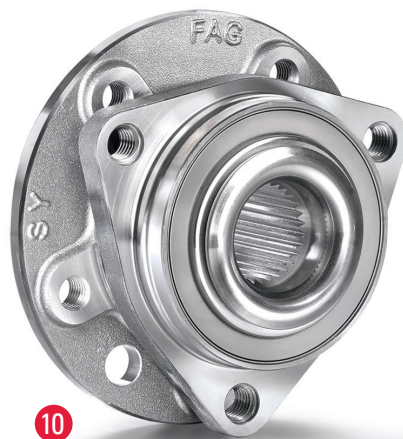

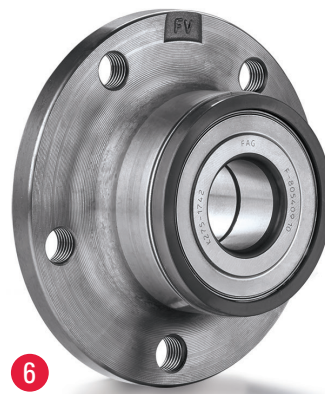

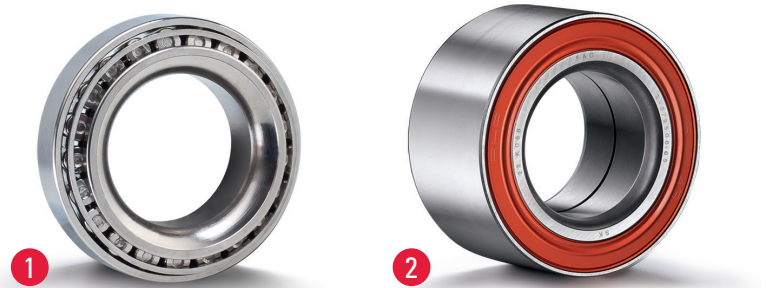

- 3 Generation 1T**  
Double-row angular tapered roller bearing with/without multipole encoder

- 4 Generation 1**  
Double-row angular ball bearing with snap ring, with/without multipole encoder

- 5 Generation 2**  
Double-row, sealed angular ball bearing with conventional encoder

- 6 Generation 2**  
Double-row, sealed angular ball bearing with multipole encoder

- 7 Generation 2D**  
Double-row, sealed tapered roller bearing

Innovations from FAG pave the way for the automotive industry. For example, FAG invented and patented the ball grinder for forming perfectly round balls, heralding the industrialisation of roller bearing production. And with the invention of the orbitally formed shoulder, FAG made it possible to define and preset bearing preload from the start of the bearing's service life, making it safer and easier to replace wheel bearings. The snap ring and face spline provide additional safety and speed up the repair process, while the LFT (low friction torque) seal protects modern FAG wheel bearings highly effectively from contamination and ensures greater efficiency by reducing the amount of friction.

#### 8 Generation 2.1

Double-row, sealed angular ball bearing with orbitally formed shoulder, multipole encoder and snap ring

#### 9 Generation 2.1

Double-row, sealed angular ball bearing with orbitally formed shoulder, multipole encoder and snap ring

#### 10 Generation 3

Double-row, sealed angular ball bearing with orbitally formed shoulder

#### 11 Generation 3

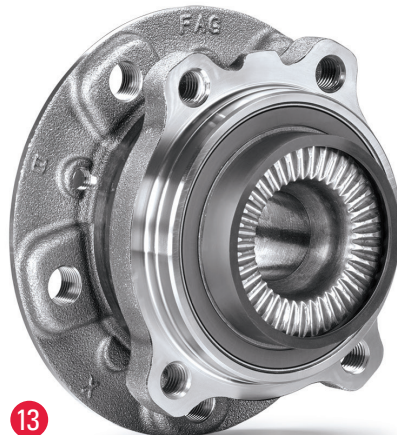

Double-row, sealed angular ball bearing with orbitally formed shoulder, multipole encoder and sensor

#### 12 Generation 3.2

Double-row, sealed angular ball bearing with orbitally formed shoulder, multipole encoder

#### 13 Generation 3.2

Double-row, sealed angular ball bearing with orbitally formed shoulder, multipole encoder, face spline and LFT

## Special tool

FAG wheel bearing repair solution for vans,  
Ref. Nr. 400 6199 10

A worn wheel bearing is no big deal, as long as it's not an axle housing wheel bearing unit. More and more vehicles are fitted with this solution. This means that to replace the wheel bearing the entire axle housing including the integrated wheel bearing has to be replaced.

With the FAG wheel bearing repair solution for vans, only the bearing itself has to be changed – nothing else.

**This effective solution can save up to 50% of a complete hub unit replacement thanks to a reduction in both fitting time and component costs.**

It is common knowledge that high mileage and heavy loads lead to bearing damage. Commercial vehicles therefore are particularly often affected. The Mercedes Vito/Viano, Sprinter and the VW Crafter are factory-equipped with wheel bearings permanently installed in the axle housings.

Longer repair times not only mean a lot of lost time for companies and fleet operators

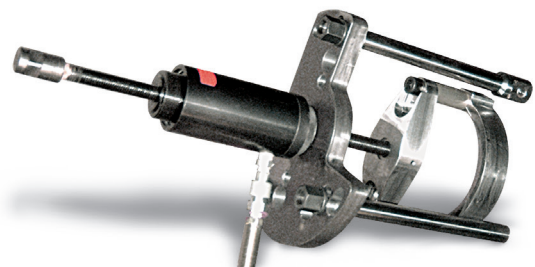

but lost sales as well. This down time can be minimized with the FAG solution – a great advantage for the garage and definitely the best way to build customer loyalty and satisfaction.

### **Back on the road faster!**

A 60% time saving compared to the conventional repair is a clear advantage. This lower cost and faster repair sets a new standard. Short pitstops instead of lengthy repairs mean more scheduling flexibility at the garage.

No wheel alignment, no axle housing replacement – Removal and reinstallation of the axle housing with its required wheel alignment are no longer necessary.

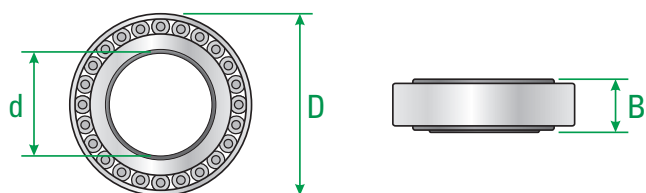

The FAG wheel bearing repair solution for vans is the best pitstop strategy for more efficiency in every garage.

## Example

You have a vehicle and are looking for the correct spare part – Example: Rear axle, Audi A4 1.8T, 132kW, AJL, 11/99, WAUZZZ8DZX1234567

The following parts are to be considered:  
713 6103 70

- ① Search for vehicle in the list
- ② Note the kW and additional information
- ③ Search for item number

## Part identification

The part number shows you the part in question. This provides you with a quick overview and enables you to allocate the parts more easily.

- a** Product Group  
713 **6** = Wheel Bearing Kit  
713 **8** = Wheel Pro  
(2 x Wheel Bearing Kit)

- b** Non specific sequential number

- c** Constant (always 0)

**a** **b** **c**  
**7136 0011 0**

## Schaeffler REPPERT

### The service brand for garage professionals

Under the REPPERT brand we offer a comprehensive package of services for the products and repair solutions of the LuK, INA, FAG, and Ruville brands. Looking for specific information or damage diagnosis? Are you in need of particular tools to make your everyday garage routine easier? Whether online portal, service hotline, installation instructions and videos, training seminars, or events – all technical services are provided in just one place.

#### WORK

- › Product range
- › REPPERT online catalog
- › Repair instructions
- › Product advantages
- › Improved bonus shop
- › Failure diagnoses

#### LEARN

- › Product knowledge
- › Training opportunities and training content
- › How-to videos

#### INFORM

- › Event calendar
- › The latest product updates and service information

## Schaeffler en Rechange Automobile : quatre marques fortes.

Le marché de la rechange automobile est en constante évolution du fait des exigences et attentes de ses acteurs qui sont toujours plus élevées. C'est pourquoi seuls ceux qui sont capables d'y répondre et de faire face à des tels challenges, peuvent réussir. Avec ses quatre marques fortes que sont LuK, INA, FAG et Ruville, Schaeffler est parfaitement préparé pour l'avenir du secteur de la rechange automobile.

La division Automotive Aftermarket propose des solutions de réparation innovantes offrant la qualité d'origine et accorde une attention particulière aux prestations de services complètes destinées aux ateliers de réparation. Que ce soit la transmission, le moteur ou le châssis, tous les produits reposent sur une approche systémique globale. Grâce à sa capacité d'innovation, à son expertise technique, ainsi qu'à ses procédés de fabrication et ses produits de haute qualité, Schaeffler est l'un des principaux partenaires de développement dans la fabrication en série. Schaeffler est également précurseur aussi bien en pièces détachées de haute qualité qu'en solutions de réparation complètes, et toujours au standard de qualité d'origine.

FAG met à disposition tous les éléments nécessaires pour un remplacement irréprochable et professionnel des roulements de roue. La fiabilité de nos roulements de roue ainsi que nos solutions de réparation innovantes nous permettent d'offrir un large choix allant du kit classique de roulements de roue FAG WheelSet

au Kit FAG WheelPro (pour la réparation des essieux complets) destinés aux véhicules légers. Ce choix s'étend également à nos solutions de réparation pour VUL ainsi qu'à nos unités de roulements de roue prémontées destinées aux véhicules Poids-Lourds telles que le FAG RIU (Repair Insert Unit) ou encore le FAG SmartSET.

## Des solutions de réparation conçues par des pros pour les pros

Depuis 1883, FAG est le spécialiste des roulements de précision. Ces années d'expérience dans la production de roulements de roue – pièce à forte demande sur le marché – présentent un réel avantage pour les réparateurs qui peuvent ainsi bénéficier du savoir-faire de FAG. Depuis 2005, le programme de kit de roulements de roue FAG est disponible pour le marché de la rechange indépendante. Aujourd'hui, ces kits sont le format le plus sollicité pour les roulements de roue. Les professionnels des ateliers appréciant la qualité, peuvent donc faire confiance à la grande expérience de FAG dans ce domaine.

La longévité et la précision des pièces qu'ils installent leur tient particulièrement à cœur. Parce que FAG veille à ce que chaque réparation soit aussi simple que possible, tous les accessoires nécessaires pour une réparation professionnelle se trouvent dans le kit FAG en plus du roulement de roue.

Ces pièces supplémentaires font toute la différence : les écrous et les boulons, équipés de différents systèmes de sécurité, sont parfaitement adaptés aux roulements de roue et aux véhicules correspondants. Une solution de réparation optimale se mesure à la qualité de ses composants au détail qui la constituent. C'est pourquoi, ces composants doivent être de la plus haute qualité et fournis avec les services adéquats s'y rattachant. C'est ainsi que :

- la position du roulement de roue est sécurisée dans la fusée d'essieu,
- la précharge du roulement de roue est maintenue tout au long de sa durée de vie,
- une fonctionnalité optimale est assurée,
- une usure prématurée ou une éventuelle défaillance du roulement de roue sont évitées.

Le roulement de roue et les accessoires appropriés font partie d'un système à part entière. La qualité et la pertinence des accessoires sont les éléments essentiels du concept de sécurité. **Ensemble, ils forment le système de sécurité FAG, auquel vous pouvez toujours vous fier.**

FAG le sait bien : le temps, c'est de l'argent. C'est pourquoi nos kits contiennent des notices de montage non verbales en complément, si nécessaire. Ainsi, vous parvenez rapidement à votre but. Si vous avez besoin d'aide, les informations techniques nécessaires portant sur toutes les références de la marque FAG sont disponibles sur le site dédié aux garages REPERT. En outre, notre assistance technique téléphonique gratuite est à votre disposition.

### FAG WheelPro : l'offre parfaitement adaptée aux véhicules les plus anciens

Avec 60 références pour environ 114 millions de voitures en Europe, cette gamme de produits répond à la demande des clients en matière de rapport qualité/prix. Pour les véhicules ayant un kilométrage élevé, on ne peut nier que le deuxième roulement de roue sur le même essieu risque également de présenter une défaillance rapidement.

FAG WheelPro, comme solution de réparation pour l'essieu complet, est une intervention d'entretien préventif qui fait économiser du temps et de l'argent au client à long terme. Et ce pour presque un véhicule sur trois en Europe !

## Avantages des roulements de roue FAG

Les roulements de roues sont des composants liés à la sécurité. Chez FAG, il est évident que la qualité se retrouve à tous les niveaux. Les matériaux, le développement, la production et les tests répondent aux normes les plus strictes. Grâce à sa couverture la plus large du marché pour les véhicules légers, FAG se démarque singulièrement de ses concurrents. Cependant, ce n'est pas la seule raison en faveur de la marque : avec ses innovations brevetées, FAG est un partenaire de développement privilégié de l'industrie automobile, qui met en avant constamment le développement continu et offre des solutions adéquates à toutes les problématiques.

- 1 Roulement à rouleaux coniques standard**  
Roulement à rouleaux coniques désassemblables
- 2 Génération 1**  
Roulement à billes à contact oblique double rangée avec/sans encodeur multipolaire
- 3 Génération 1T**  
Roulements à rouleaux coniques à double rangée avec/sans encodeur multipolaire
- 4 Génération 1**  
Roulement à billes à contact oblique à double rangée avec bague de sécurité et avec/sans encodeur multipolaire

- 5 Génération 2**  
Unité de roulement de roue compacte avec roulement à double rangée de billes à contact oblique avec encodeur classique
- 6 Génération 2**  
Unité de roulement de roue compacte avec roulement à double rangée de billes à contact oblique avec encodeur multipolaire
- 7 Génération 2D**  
Unité de roulement de roue compacte avec roulement à rouleaux coniques à double rangée

Les innovations de FAG ont valeur d'exemple pour l'industrie automobile. Ainsi, FAG n'a pas seulement inventé et breveté la machine à rectifier des billes, pour des billes parfaites, mais a alors amorcé l'industrialisation de la production de roulements en série. Avec l'invention de l'épaule à formation orbitale, FAG veille à ce que la précharge du roulement soit définie et réglée dès le début. Remplacer un roulement de roue est ainsi devenu plus facile et plus sûr. La couronne de blocage et la denture droite offrent davantage de sécurité et contribuent à des procédures de réparation plus rapides. En parallèle, le joint à faible frottement LFT protège très efficacement les roulements de roue FAG modernes contre la saleté, tout en assurant une plus grande efficacité en réduisant le frottement.

**8 Génération 2.1**

Unité de roulement de roue compacte avec roulement à double rangée de billes à contact oblique avec épaule à formation orbitale, encodeur multipolaire et bague de sécurité

**9 Génération 2.1**

Unité de roulement de roue compacte avec roulement à double rangée de billes à contact oblique avec épaule à formation orbitale, encodeur multipolaire et bague de sécurité

**10 Génération 3**

Unité de roulement de roue compacte avec roulement à double rangée de billes à contact oblique avec épaule à formation orbitale

**11 Génération 3**

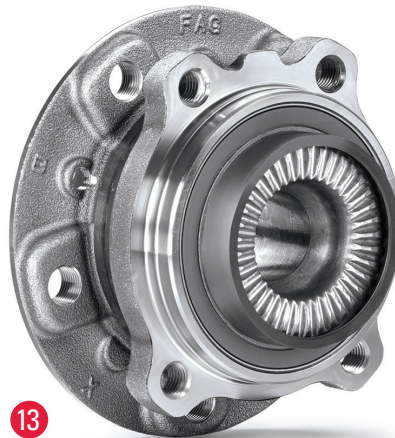

Unité de roulement de roue compacte avec roulement à double rangée de billes à contact oblique avec épaule à formation orbitale, encodeur multipolaire et capteur

**12 Génération 3.2**

Unité de roulement de roue compacte avec roulement à double rangée de billes à contact oblique avec épaule à formation orbitale et encodeur multipolaire

**13 Génération 3.2**

Unité de roulement de roue compacte avec roulement à double rangée de billes à contact oblique avec épaule à formation orbitale, encodeur multipolaire, denture frontale et technologie LFT (Etanchéité à friction réduite)

## Outillage spécial

Solution de réparation FAG VUL,  
référence 400 6199 10

L'endommagement d'un roulement de roue n'est pas un problème insolvable tant qu'il ne s'agit pas d'une fusée d'essieu complète avec unité de roulement de roue déjà pré-montée. Or, de plus en plus de véhicules présentent ce type de montage. De ce fait, lors de l'entretien-réparation, il est impératif de remplacer la fusée d'essieu complète avec l'unité de roulement de roue déjà pré-montée.

Avec la solution de réparation FAG VUL, seule l'unité de roulement de roue est à remplacer, et rien d'autre!

**Cette solution efficace permet d'économiser plus de 50 % des coûts au total et d'éviter de nombreuses manipulations.**

En général, l'endommagement des roulements résulte de kilométrages élevés et de fortes sollicitations. Les véhicules utilitaires sont donc particulièrement concernés. Les modèles Vito, Viano et Sprinter de Mercedes ainsi que le VW Crafter sont équipés en première monte de fusées d'essieu avec roulement intégré.

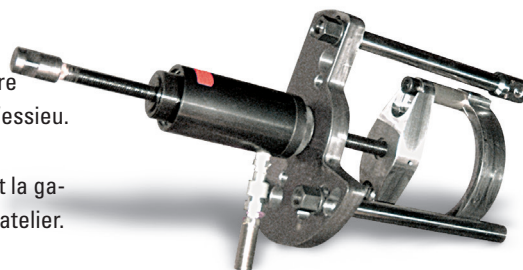

De longues durées d'intervention pour la réparation signifient pour les entreprises et les gestionnaires de flottes non seulement une sérieuse perte de temps, mais aussi un manque à gagner en termes de chiffre d'affaires. Avec la solution de réparation FAG VUL, les durées d'immobilisation sont significativement réduites. Un argument sans appel pour l'atelier et la meilleure solution pour une clientèle fidèle et satisfaite.

### Plus vite de nouveau sur la route!

Gagner jusqu'à plus de 60% de temps sur la réparation par rapport à une réparation traditionnelle est un avantage incontestable! Plus abordable et plus rapide, ce type de réparation instaure un nouveau standard. La solution FAG permet une réduction de l'immobilisation du véhicule et donc un meilleur taux d'occupation de l'atelier.

Avec la solution FAG, plus besoin de faire la géométrie ni de remplacer la fusée d'essieu.

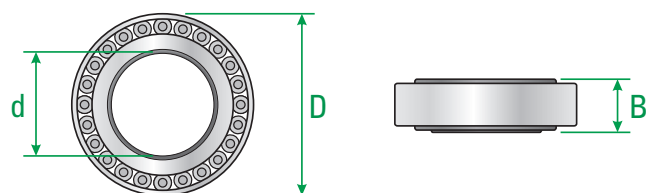

La solution de réparation FAG VUL, c'est la garantie de plus d'efficacité dans chaque atelier.

## Schaeffler REPPERT

### La marque de services pour les pros de l'atelier.

Avec REPPERT, nous vous offrons des prestations de services complètes autour de nos produits et de nos solutions de réparation LuK, INA, FAG et Ruville. Cherchez-vous des informations ciblées pour un diagnostic des pannes ? Ou avez-vous besoin d'outils concrets pour vous faciliter le quotidien à l'atelier ? Sur le portail en ligne, via l'assistance téléphonique ou lors d'événements, REPPERT vous offre toutes les prestations de services techniques.

#### TRAVAILLER

- › Gamme de produits
- › Catalogue en ligne REPPERT
- › Notices de montage
- › Avantages du produit
- › Bonus-shop amélioré
- › Diagnostic des pannes

#### APPRENDRE

- › Connaissance des produits
- › Offres de formation et contenus de formation
- › Tutoriels vidéos

#### S'INFORMER

- › Calendrier des événements
- › Nouveautés sur les produits, les services et bien plus encore

## Schaeffler en el sector posventa del mercado del automóvil: cuatro marcas líderes del mercado

El sector posventa del mercado del automóvil está en constante movimiento. Los requisitos y las expectativas de todos los operadores aumentan cada día más. Por ello, solo prevalecerá en el mercado quien sea capaz de satisfacer esta estricta demanda y estar a la altura de los retos. Con sus cuatro marcas líderes del mercado LuK, INA, FAG y Ruville, Schaeffler está en una posición óptima para afrontar el futuro del sector posventa del mercado del automóvil.

La división Automotive Aftermarket proporciona soluciones de mantenimiento innovadoras con la calidad del equipamiento original y una especial atención a servicios completos para talleres. Tanto si se trata de la transmisión, el motor o el chasis, encontrará un enfoque sistemático integral para todos los productos. Los conceptos de innovación, competencia técnica y máxima calidad de fabricación y producto convierten a Schaeffler no solo en uno de los socios de desarrollo líderes de la fabricación en serie, sino también en un proveedor pionero de recambios de calidad y soluciones de reparación integrales, siempre con la calidad del equipamiento original.

FAG suministra todo lo necesario para un cambio de rodamiento de rueda del máximo nivel. La fiabilidad de los rodamientos de rueda y las innovadoras soluciones de reparación abarcan desde el clásico conjunto de rodamientos de rueda FAG WheelSet, pasando por

FAG WheelPro (para la sustitución de rodamientos de rueda por eje), hasta las soluciones de reparación de rodamientos de rueda para vehículos comerciales ligeros, así como unidades de rodamientos de rueda premontadas para vehículos comerciales pesados, como FAG RIU (Repair Insert Unit) y FAG SmartSET.

## Soluciones de reparación entre profesionales

Desde 1883, FAG es experto en rodamientos de precisión. Esta dilatada experiencia con una pieza sometida a un uso tan intensivo como lo es el rodamiento de rueda constituye una gran ventaja para el taller, ya que se beneficia de los conocimientos de FAG. La gama de juegos de rodamientos de rueda de FAG está disponible en el mercado de recambios desde 2005. En la actualidad forman parte de los rodamientos de rueda más demandados. Los profesionales de los talleres aprecian la calidad y, por tanto, apuestan por la amplia experiencia de FAG.

Dan especial importancia a la durabilidad y precisión de las piezas que ellos mismos montan. Dado que FAG se preocupa por facilitar cada reparación al máximo, en los embalajes de FAG se incluyen, además de los rodamientos de rueda, todos los accesorios necesarios para garantizar una reparación profesional.

Y son precisamente esas piezas complementarias las que marcan la diferencia: Los tornillos y tuercas equipados con diferentes sistemas de seguridad se ajustan perfectamente al rodamiento de rueda y vehículo correspondiente. Una solución de reparación perfecta es la suma de las piezas individuales, junto con una alta calidad y un servicio técnico a la altura de las expectativas. De esta forma:

- Se asegura la fijación del rodamiento de rueda al muñón del eje
- Se mantiene de forma duradera la precarga del rodamiento de rueda
- Se garantiza una concentricidad óptima
- Se evita el desgaste innecesario y un posible fallo del rodamiento de rueda.

El rodamiento de rueda y el accesorio correspondiente se entienden como un único sistema. La calidad y el accesorio inteligente son los pilares fundamentales del concepto de seguridad. **Juntos constituyen el sistema de seguridad FAG, que le brinda una confianza absoluta.**

FAG entiende que el tiempo es dinero. Por ello, nuestros embalajes contienen también instrucciones de montaje no verbales siempre que sean necesarias, lo que permite actuar de manera más rápida. En caso de necesitar asistencia, en el portal para talleres de REPERT encontraré la información técnica necesaria referente a todos los artículos de la casa FAG. Además, ponemos a su disposición nuestra línea de atención técnica gratuita.

### FAG WheelPro: la opción inteligente para vehículos de gran kilometraje

Con 60 artículos para cerca de 114 millones de vehículos en Europa, esta oferta de productos satisface la necesidad de los clientes de conseguir un precio atractivo. En los vehículos de gran kilometraje, no se puede pasar por alto el hecho de que el segundo rodamiento de rueda del mismo eje también va a fallar a corto plazo.

Como solución de reparación para todo el eje, FAG WheelPro es una medida de mantenimiento que, a largo plazo, va a permitir al cliente ahorrar tiempo y dinero. Y esto se aplica prácticamente a uno de cada tres vehículos en Europa.

## ¿Por qué merece la pena apostar por los rodamientos de rueda FAG?

Los rodamientos de rueda son componentes relevantes para la seguridad. En FAG, la calidad es inherente a todos los niveles. El material, el desarrollo, la fabricación y las pruebas cumplen las máximas exigencias. FAG tiene una presencia en el mercado de los turismos especialmente destacada entre la competencia. Pero ese no es el único punto fuerte de la marca; gracias a sus innovaciones patentadas, FAG es el socio de desarrollo preferido en la industria automovilística, impulsa el desarrollo continuo y ofrece la solución adecuada frente a cualquier problemática.

- 1 Rodamiento de rodillos cónicos estándar**  
Rodamiento de rodillos cónicos desmontable

- 2 Generación 1**  
Rodamiento de bolas de contacto angular de dos hileras con/sin codificador multipolar

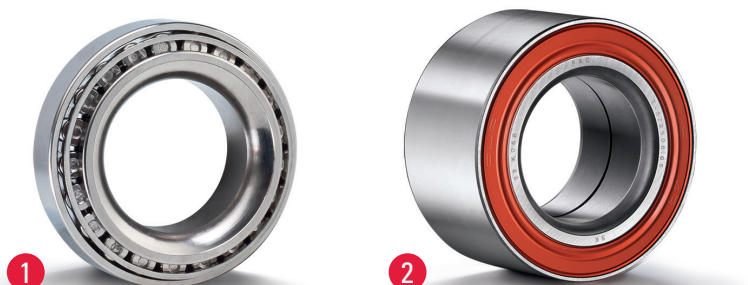

- 3 Generación 1T**  
Rodamiento de rodillos cónicos de dos hileras con/sin codificador multipolar

- 4 Generación 1**  
Rodamiento de bolas de contacto angular de dos hileras con corona de bloqueo y con/sin codificador multipolar

- 5 Generación 2**  
Rodamiento de bolas de contacto angular estanco de dos hileras con codificador convencional

- 6 Generación 2**  
Rodamiento de bolas de contacto angular estanco de dos hileras con codificador multipolar

- 7 Generación 2D**  
Rodamiento de rodillos cónicos estanco de dos hileras

Las innovaciones de FAG marcan tendencia en la industria automovilística. FAG no solo ha creado y patentado la máquina rectificadora de bolas para conseguir bolas perfectas, iniciando así la industrialización de la producción de rodamientos. Con la invención del proceso de conformado orbital FAG hizo posible definir y preajustar la tensión previa del rodamiento desde el principio. Desde entonces, el cambio de rodamientos de rueda resulta más sencillo y seguro. La corona de bloqueo y el dentado Hirth aportan mayor seguridad y permiten agilizar los procedimientos de reparación. Al mismo tiempo, la junta de baja fricción LFT protege eficazmente los modernos rodamientos de rueda FAG frente a la suciedad y proporciona también mayor eficiencia debido a la fricción reducida.

### 8 Generación 2.1

Rodamiento de bolas de contacto angular estanco de dos hileras con conformado orbital, codificador multipolar y corona de bloqueo

### 9 Generación 2.1

Rodamiento de bolas de contacto angular estanco de dos hileras con conformado orbital, codificador multipolar y corona de bloqueo

### 10 Generación 3

Rodamiento de bolas de contacto angular estanco de dos hileras con conformado orbital

### 11 Generación 3

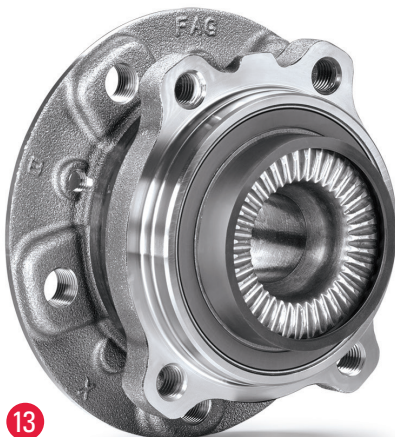

Rodamiento de bolas de contacto angular estanco de dos hileras con conformado orbital, codificador multipolar y sensor

### 12 Generación 3.2

Rodamiento de bolas de contacto angular estanco de dos hileras con conformado orbital y codificador multipolar

### 13 Generación 3.2

Rodamiento de bolas de contacto angular estanco de dos hileras con conformado orbital y codificador multipolar, dentado y junta de baja fricción

## Herramienta especial

Herramienta para la instalación de Kit de rodamientos de rueda FAG en comerciales ligeros.  
Referencia 400 6199 10

EL cambio de un rodamiento de rueda no supone un gran problema a no ser que tratemos un vehículo con el rodamiento integrado en la mangueta formando una unidad. Cada vez más vehículos incorporan esta solución. En este caso, la única opción de reparación hasta ahora era cambiar toda la mangueta con el rodamiento de ruedas integrado.

¡Con la solución de reparación de rodamientos de ruedas FAG para comercial ligero se cambian solo los rodamientos y nada más!

**Esta solución efectiva ahorra más del 50 % de los costes totales.**

Un elevado kilometraje unido a altas cargas en el vehículo son causas conocidas que conducen a daños en los rodamientos de rueda. Los comerciales ligeros son por ello especialmente susceptibles a un posible cambio de este componente. Los modelos de Mercedes Vito, Viano y Sprinter, así como el VW Crafter, vienen de fábrica con rodamientos de ruedas integrados en el buje.

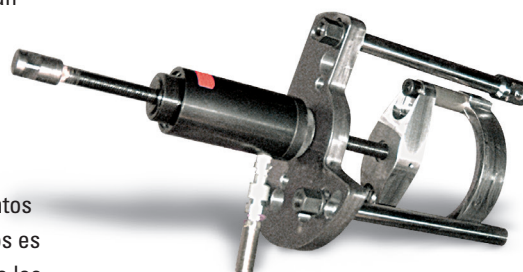

Las largas reparaciones suponen una pérdida de tiempo y de oportunidades de negocio para empresas y gestores de flotas. Minimizar los tiempos de inactividad con la solución de reparación FAG: un buen argumento para el taller y la mejor solución para fidelizar y dejar satisfechos a los clientes.

### ¡Intervenciones más rápidas!

Conseguir más del 60 % de ahorro de tiempo frente a una reparación convencional presenta claras ventajas. La reparación más barata y rápida marca nuevas tendencias. En vez de largos tiempos de inactividad, más flexibilidad en la planificación del taller.

Sin tener que alinear, sin cambio de mangueta: dado que se prescinde por completo del montaje y desmontaje de la mangueta de la correspondiente medición de eje.

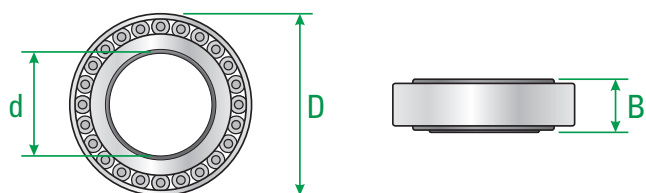

La solución de reparación de rodamientos de ruedas FAG para comerciales ligeros es la estrategia mejor y más eficiente para las reparaciones en cualquier taller.

## Ejemplo

Ud. tiene un vehículo y busca el repuesto apropiado - Ejemplo:  
Eje trasero, Audi A4 1.8T, 132kW, AJL, 11/99, WAUZZZ8DZX1234567

Para ese código de motor aparecen:  
713 6103 70

- 1 Buscar vehículo en el catálogo

## Identificación de pieza

La numeración de los artículos le indica de qué pieza se trata. Así dispone Ud. de una vista general inmediata y puede identificar más fácilmente las piezas.

- a** Grupo de productos  
713 **6** = Kit de rueda  
713 **8** = Wheel Pro. Kit de eje  
(2 x Kit de rueda)

- b** Numeración sin ningún significado en particular

- c** Constante (siempre 0)

**a** **b** **c**  
**7136 0011 0**

## Schaeffler REPPERT

### La marca de servicios para talleres profesionales

A través de REPPERT ofrecemos numerosos servicios para todos nuestros productos y soluciones de reparación de LuK, INA, FAG y Ruville. ¿Busca información específica para el diagnóstico de averías? ¿O necesita herramientas concretas que faciliten el trabajo diario en el taller? Portal en línea, línea de atención técnica, eventos... REPPERT pone a su disposición todo tipo de servicios técnicos.

#### PARA TRABAJAR

- › Gama de productos
- › Catálogo en línea de REPPERT
- › Instrucciones de montaje
- › Ventajas de productos
- › Programa de puntos mejorado
- › Diagnóstico de averías

#### PARA APRENDER

- › Conocimiento del producto
- › Oferta y contenidos de formación
- › Vídeos de ayuda

#### PARA INFORMARTE

- › Calendario de eventos
- › Novedades en productos, servicios y mucho más

Regístrese ahora gratis y en solo unos pasos en:

## Schaeffler nell'Automotive Aftermarket: quattro solidi marchi.

L'Automotive Aftermarket è in costante movimento. Le richieste e le aspettative di tutti gli operatori del mercato non cessano di aumentare. A resistere saranno pertanto solo i soggetti che sapranno essere all'altezza di questi elevati requisiti e di queste sfide. Schaeffler nell'Automotive Aftermarket con i quattro solidi marchi LuK, INA, FAG e Ruville gode della migliore posizione con cui poter affrontare il futuro.

La divisione Automotive Aftermarket fornisce soluzioni innovative di riparazione con qualità di primo impianto ponendo l'accento in particolare sull'offerta completa di servizi per le officine. Che si tratti di componenti trasmissione, motore o chassis, alla base di tutti i prodotti c'è un approccio di sistema globale. Innovazione, know-how tecnico e la massima qualità nei prodotti e nei processi produttivi fanno di Schaeffler non solo uno dei partner di sviluppo leader nel settore della produzione in serie, ma anche un solido punto di riferimento tra i fornitori di ricambi che mantengono valore nel tempo e di soluzioni di riparazione che considerano l'intero sistema: sempre con qualità da primo impianto.

FAG offre tutto ciò che è necessario per una sostituzione del cuscinetto ruota di qualità ineccepibile. La gamma di cuscinetti ruota e delle innovative soluzioni di riparazione spaziano dal set classico di

cuscinetti ruota WheelSet FAG, attraverso il WheelPro FAG (per la sostituzione dei cuscinetti ruota su tutto l'asse) fino alle soluzioni di riparazione di cuscinetti ruota per veicoli commerciali leggeri, nonché alle unità di montaggio per veicoli commerciali pesanti, quali il RIU (Repair Insert Unit) FAG e lo SmartSET FAG.

## Soluzioni di riparazione da professionisti per professionisti

FAG è il professionista dei cuscinetti di precisione dal 1883. Poter usufruire di questa esperienza di lunga tradizione, per un componente sottoposto a sollecitazioni così elevate come è il cuscinetto ruota, rappresenta un vantaggio decisivo per l'officina che in questo modo trae diretto vantaggio dal know-how FAG. La gamma di soluzioni di riparazione per cuscinetti ruota FAG risale al 2005 sul mercato dei ricambi. Attualmente sono i cuscinetti più richiesti sul mercato. I professionisti dell'officina danno grande importanza alla qualità e si affidano quindi alla lunga esperienza di FAG.

Per gli autoriparatori la lunga durata e la precisione dei componenti che utilizzano è della massima importanza. Poiché FAG assicura che ogni riparazione riesca nel modo più semplice possibile, le confezioni FAG oltre al cuscinetto ruota contengono anche numerosi accessori necessari per una riparazione a regola d'arte.

E sono proprio questi componenti aggiuntivi a fare la differenza: le viti e i dadi, cui sono associati diversi sistemi di sicurezza, sono predisposti per abbinarsi alla perfezione al cuscinetto ruota e al veicolo specifici. Perché una soluzione di riparazione perfetta è il risultato dei singoli componenti di cui è composta: alta qualità, con i rispettivi servizi. In questo modo si ottiene un risultato in cui

- la sede del cuscinetto ruota è assicurata al fuso,
- il precarico del cuscinetto ruota si conserva a lungo,
- viene garantita una coassialità ottimale e
- si evita un'inutile usura che potrebbe determinare il guasto del cuscinetto ruota.

Il cuscinetto ruota e gli accessori a esso associati vanno considerati come un sistema unico. La qualità e gli accessori intelligenti sono gli elementi essenziali del concetto di sicurezza. **Assieme questi due elementi creano il sistema di sicurezza FAG, un sistema su cui potete sempre fare affidamento.**

FAG lo sa: il tempo è denaro. Per questo motivo alle nostre confezioni sono associate anche istruzioni non verbali, qualora necessario. In questo modo raggiungete rapidamente l'obiettivo. Gli operatori che hanno bisogno di supporto, tuttavia, possono trovare le necessarie informazioni su tutti i prodotti del marchio FAG sul portale per le officine REPERT. È inoltre possibile accedere alla nostra Hotline di assistenza gratuita.

### WheelPro FAG – la gamma intelligente per i veicoli con elevata percorrenza negli anni

Con 60 articoli per circa 114 milioni di veicoli in Europa, questa gamma di prodotti risponde alle esigenze della clientela con un prezzo interessante. Per i veicoli a chilometraggio elevato non si può escludere che anche il secondo cuscinetto ruota dello stesso assale possa guastarsi a breve termine.

WheelPro FAG rappresenta quindi, quale soluzione di riparazione per l'assale completo, un intervento di manutenzione preventiva che risparmia tempo e denaro al cliente nel lungo periodo. Ed è una soluzione che viene scelta per circa un veicolo su tre in tutta Europa!

## È per questo motivo che risulta conveniente scegliere cuscinetti ruota FAG

I cuscinetti ruota sono componenti di grande rilevanza per la sicurezza. Nei prodotti FAG, la qualità è un fatto ovvio su tutti i livelli. Materiale, sviluppo, lavorazione e test soddisfano i requisiti più elevati. La più grande copertura di mercato nel settore delle autovetture mette in evidenza FAG rispetto alla concorrenza. Ma non è solo questo che va a favore del marchio: grazie alle sue innovazioni brevettate, FAG è un partner di sviluppo privilegiato dell'industria automobilistica, fa progredire costantemente lo sviluppo tecnologico e offre la soluzione adeguata per tutti i problemi.

- 1 Cuscinetto conico standard**  
Cuscinetto conico smontabile
- 2 Generazione 1**  
Cuscinetto per spinte oblique a 2 solchi con/senza encoder multipolo
- 3 Generazione 1T**  
Cuscinetto conico a 2 solchi con/senza encoder multipolo
- 4 Generazione 1**  
Cuscinetto per spinte oblique a 2 solchi con corona di blocco e con/senza encoder multipolo

- 5 Generazione 2**  
Cuscinetto per spinte oblique a 2 solchi, impermeabilizzato, con encoder tradizionale
- 6 Generazione 2**  
Cuscinetto per spinte oblique a 2 solchi, impermeabilizzato, con encoder multipolo
- 7 Generazione 2D**  
Cuscinetto conico a 2 solchi impermeabilizzato

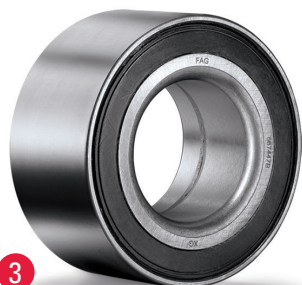

Le innovazioni FAG sono determinanti per l'industria automobilistica. Per questo motivo FAG non solo ha inventato e brevettato la rettificatrice per produrre sfere perfette, introducendo in tal modo l'industrializzazione della produzione dei cuscinetti a rotolamento. Grazie alla tecnologia per la formatura orbitale, FAG ha fatto in modo che il precarico del cuscinetto sia definito e preimpostato fin dall'inizio. In questo modo la sostituzione del cuscinetto ruota è divenuta più semplice e sicura. La corona di blocco e la dentatura frontale contribuiscono al raggiungimento di un grado più elevato di sicurezza e rendono più veloci le procedure di riparazione. Al tempo stesso la guarnizione LFT per le basse viscosità protegge con grande efficienza i moderni cuscinetti ruota FAG dalle impurità e, al tempo stesso, garantisce maggiore efficienza grazie al livello più basso di attrito.

## Utensile speciale

Utensile Speciale per la riparazione dell'unità cuscinetto FAG sui veicoli commerciali leggeri  
n. art. 400 6199 10

Normalmente i danni ai cuscinetti si verificano in caso di funzionamento a lunghe percorrenze e forti sollecitazioni. I veicoli commerciali sono pertanto quelli più soggetti a questi problemi.

Attualmente alcuni produttori di veicoli offrono un'unità cuscinetto ruota preassemblata, che include il giunto dello sterzo. In questo modo, il giunto dello sterzo dovrebbe essere sostituito insieme al cuscinetto ruota, rendendo necessaria la regolazione dell'asse. E' questo il caso per es. dei modelli Mercedes Vito, Viano e Sprinter e il VW Crafter.

Con FAG, Schaeffler Automotive Aftermarket offre un'alternativa per la riparazione. Il giunto dello sterzo rimane installato nel veicolo. Utilizzando l'utensile speciale, è possibile sostituire il solo cuscinetto ruota, senza che si renda necessaria questa regolazione.

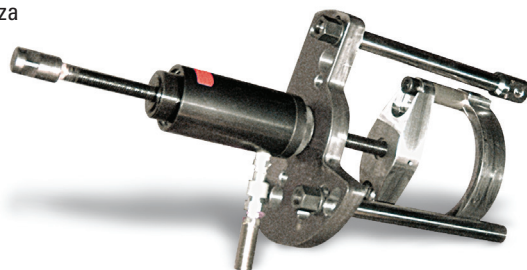

**Questa efficace soluzione permette di ridurre i costi dell'intervento.**

Lunghi fermi veicolo significano per le aziende e i gestori di flotte non solo un'elevata perdita di tempo, ma anche una riduzione del fatturato. Con la soluzione di riparazione FAG i tempi di inattività sono ridotti al minimo. Questo è un forte argomento a favore dell'officina e la migliore soluzione per fidelizzare il cliente e soddisfarlo pienamente.

Oltre il 60% di tempo risparmiato rispetto a una riparazione classica rappresenta un chiaro vantaggio. La riparazione più rapida e a prezzo inferiore diventa la regola.

Non è più necessario misurare, sostituire, smontare e rimontare l'assale con relativa nuova misurazione.

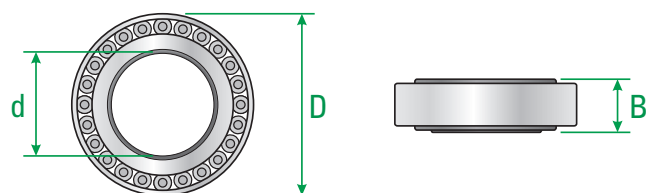

La soluzione di riparazione FAG per veicoli commerciali leggeri è la migliore strategia commerciale per una maggiore efficienza in officina.

## Identificazione del codice articolo

Il codice articolo indica di quale componente si tratta. Ciò consente di avere una rapida panoramica e di selezionare il codice articolo più velocemente.

- a** Gruppi di prodotti  
713 **6** = Kit cuscinetti ruota  
713 **8** = Wheel Pro  
(2 x Kit cuscinetti ruota)

- b** Numero privo di significato

- c** Costante (sempre 0)

**a** **b** **c**  
**7136 0011 0**

## Schaeffler REPERT

### Il marchio dell'assistenza per i professionisti dell'officina.

Con REPERT offriamo servizi completi sui nostri prodotti e soluzioni di riparazione LuK, INA, FAG e Ruville. Siete alla ricerca di informazioni specifiche per la diagnosi dei guasti? Oppure di strumenti concreti di lavoro per facilitare le procedure di officina? Sul portale online, con l'hotline di assistenza o nel corso di eventi di formazione, REPERT vi offre tutti i servizi tecnici che cercate.

#### PER IL LAVORO

- › Gamma di prodotti
- › Catalogo online Repexpert
- › Istruzioni di montaggio
- › Vantaggi dei prodotti
- › Gestione bonus migliorata
- › Diagnosi dei guasti

#### PER L'APPRENDIMENTO

- › Conoscenze sui prodotti
- › Offerte di corsi di formazione e contenuti delle sessioni
- › Video formativi pratici

#### PER L'INFORMAZIONE

- › Calendario eventi
- › Novità su prodotti, servizi e molto altro ancora

Registrarsi è gratis e richiede solo pochi clic in:

**WWW.REPERT.IT**

## TecDoc

### Aggiornamenti del catalogo? D'ora in avanti niente più problemi!

Approfittate delle possibilità che vi offre il DVD TecDoc. Il DVD vi mette a disposizione ogni tre mesi l'aggiornamento dei dati del catalogo per la vostra attività.

### Potete ordinare a:

TecAlliance GmbH  
 Arnikaweg 3  
 D-51109 Köln  
 Tel. +49 (0) 221/66 00-112  
 Fax +49 (0) 221/66 00-100  
 e-mail: tecdoc@tecalliance.net

**Elaborazione on line della garanzia attraverso TecWarranty**
